# Evolution of Telemedicine Program in India

# Evolution of Telemedicine in India

- Telemedicine activities at SGPGIMS were initiated in the year 1999 in the form of testing the concept of information and communication technology in the field of medicine.
- DIT has also sponsored the telemedicine project connecting three premier medical institutions - viz. SGPGI-Lucknow, AIIMS-New Delhi and PGIMER-Chandigarh.
- Telemedicine Society of India (TSI) formulated.
- 1<sup>st</sup> Telemedicine Society of India Conference held at SGPGIMS
- Live Surgery Transmitted during 5<sup>th</sup> Post Graduate Course of Endocrine Surgery (PGES)

# ISRO Telemedicine Network (Since 2001)

## Current Status ISRO TELEMEDICINE NETWORK

315 nodes  
263 Remote Hospitals,  
8 Mobiles &  
44 Speciality Hospitals

# उत्तराखंड: टेली मेडिसिन सुविधा से जुड़ेंगे चारधाम, तीर्थयात्रियों को दी जाएगी निशुल्क सुविधा

न्यूज डेस्क/अमर उजाला, देहरादून Updated Wed, 04 Apr 2018 10:22 PM IST

यमुनोत्री, गंगोत्री, बदरीनाथ और केदारनाथ में टेली मेडिसिन की निशुल्क सुविधा उपलब्ध कराने को एचपी कंपनी तैयार है। शासन का दावा है कि एक महीने के भीतर टेली मेडिसिन की सुविधा शुरू हो जाएगी। इसके अलावा 14 अप्रैल से पिथौरागढ़ जिला अस्पताल में आईसीयू की सुविधा भी मरीजों को मिलना शुरू हो जाएगी।

सचिव स्वास्थ्य नितेश झा के अनुसार अभी एचपी कंपनी टेली मेडिसिन के माध्यम से राज्य के चार अस्पतालों और श्रीनगर मेडिकल कालेज (स्टूडियो) में रोगियों को स्वास्थ्य सुविधा उपलब्ध करा रही है। इसके परिणाम काफी बेहतर आए हैं।

अब इसी तर्ज पर चारधाम में सुविधा देने की तैयारी है। टेली मेडिसिन की सुविधा के लिए स्टूडियो का निर्माण दून मेडिकल कालेज में किया जाएगा। जहां के विशेषज्ञ डॉक्टर चारधाम में चयनित चार अस्पतालों से जुड़ेंगे और वहां पर आने वाले रोगियों के इलाज में मददगार होंगे।

एक महीने के अंदर सुविधा शुरू करने का लक्ष्य रखा गया है। इसके अलावा पिथौरागढ़ के जिला अस्पताल में आईसीयू की सुविधा मरीजों को मिल सकेगी। यह राज्य का पहला जिला अस्पताल होगा, जहां पर आईसीयू की सुविधा मिलेगी। आईसीयू का निर्माण हंस फाउंडेशन के माध्यम से किया गया है।

## Telemedicine at Temples

**OVER YEARS, VARIOUS STATE GOVERNMENTS' AND THE HEALTHCARE INDUSTRY HAVE BEEN PARTNERING TO MAKE SEVERAL SERVICES AVAILABLE TO THE MASSES**

**Punjab**

Construction and operation of new super specialty hospitals in Mohali and Bhatinda, Punjab – Max Hospital

**Uttaranchal**

Mobile health clinics in collaboration with Uttaranchal Institute of Scientific research, Bhimtal (NGO)

**Rajasthan**

Diagnostic PPP with Sawai Mansingh Hospital and Soni Hospital.  
Public Health Engineering Department, Rajasthan is also involved in the development of a multi specialty hospital in Jaipur district under PPP

**Bihar**

State of Bihar Initiated an unique telemedicine project for delivering service in alternative medicine – Ayurveda , Yoga, Unani, Sidha & Homeopathy (AYUSH)

**Kerala Telemedicine Network**

Onconet - Cancer Care For Rural Masses (in six hospitals),  
Telemedicine Kerala for Taluk hospitals (in eight hospitals).  
Telehealth and Medical Education Kerala (in 18 hospitals), Rural Telemedicine Project for primary care in Tirur taluk (in 11 hospitals)

**Andhra Pradesh**

B Braun PPP for dialysis. PPP Model: Eleven dialysis centres were established in district hospitals – in Chittoor, Guntur, Hyderabad, Kakinada, Kurnool, Srikakulam, Vijayawada, Visakhapatnam and Warangal.

**Tamil Nadu**

Nexus PPP with government for one centre with 15 dialysis machines. Apollo PPP with one centre and nine dialysis machines

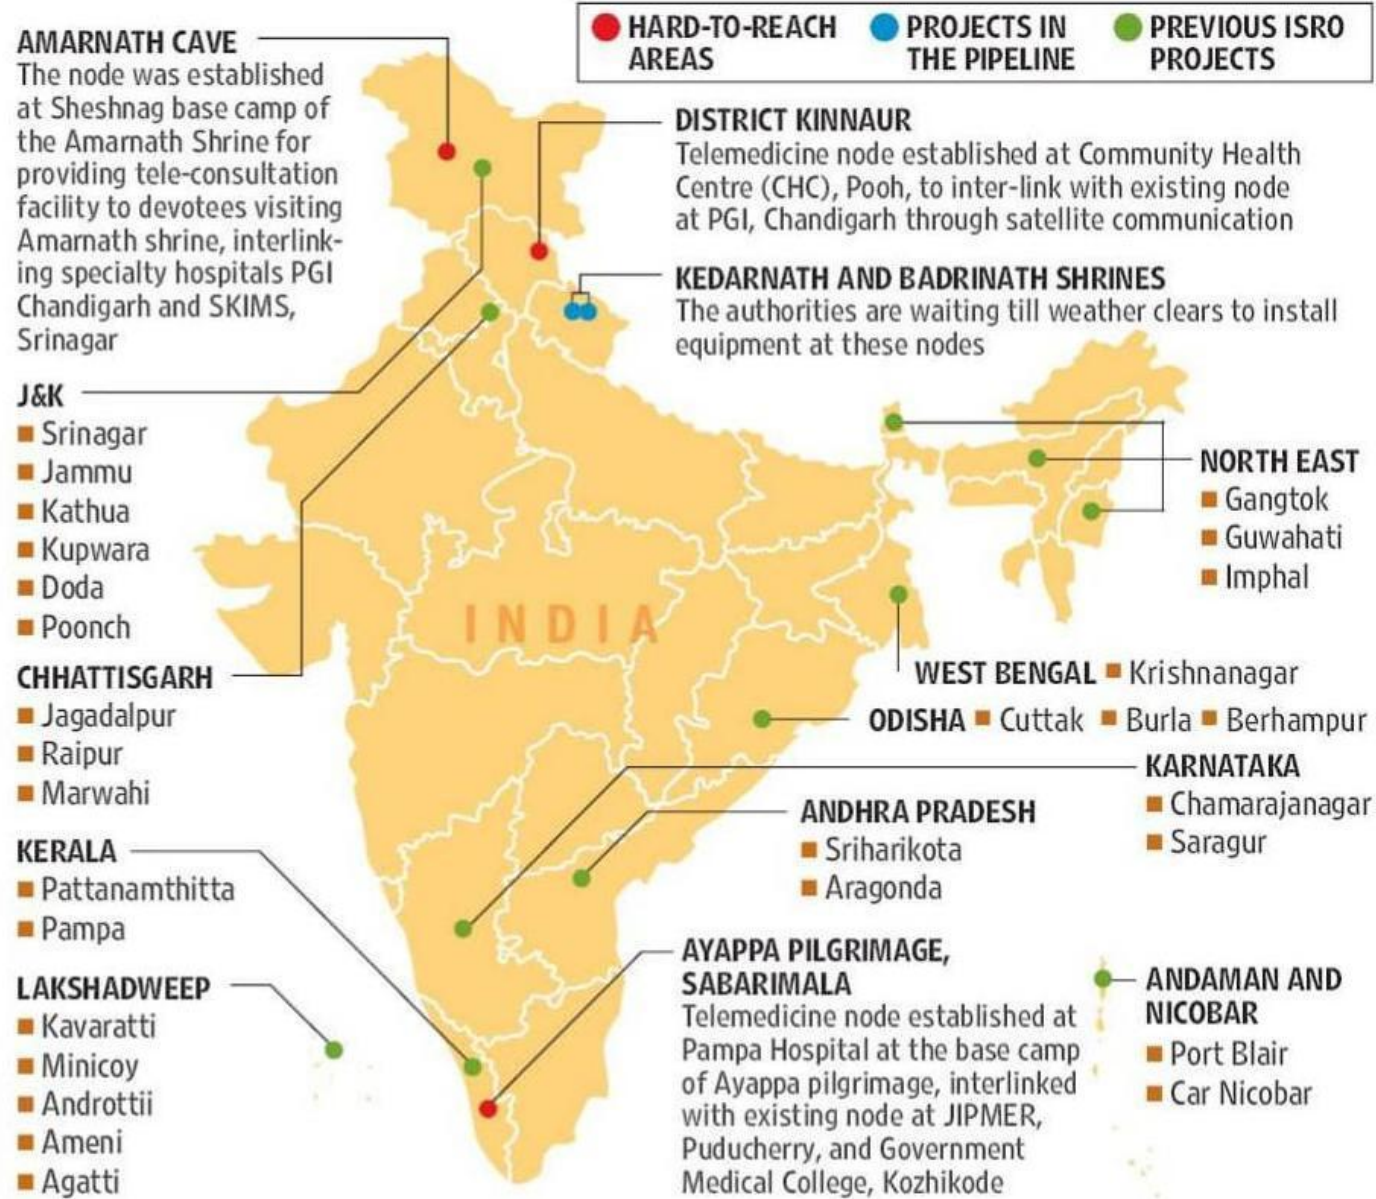

# Tele-medicine in collaboration with D/o Space at Pilgrimages

- MoHFW in collaboration with D/o Space has established a Telemedicine Node at Pampa hospital at the base camp of Ayappa pilgrimage which is interlinked with existing Telemedicine Node at JIPMER, Pondicherry and Govt. Medical College, Kozhikode (Calicut) for providing remote super speciality healthcare services.
- Telemedicine node has been setup at CHC, Pooh, Himachal Pradesh interlinked with PGIMER, Chandigarh with the purpose of providing access to speciality care to citizens inhabited at snowbound locations.
- MoHFW is in process of replicating this Tele-medicine model at Chardhams, Kedarnath and Amarnath temples and has proactively taken State Government and Department of Space on board for successful and smooth implementation.

# TAKING HEALTHCARE SERVICES TO ALL

A look at the centres set up in hard-to-reach areas this month, projects in the pipeline and the previous projects where ISRO provided satellite links to connect the centres to hospitals in cities

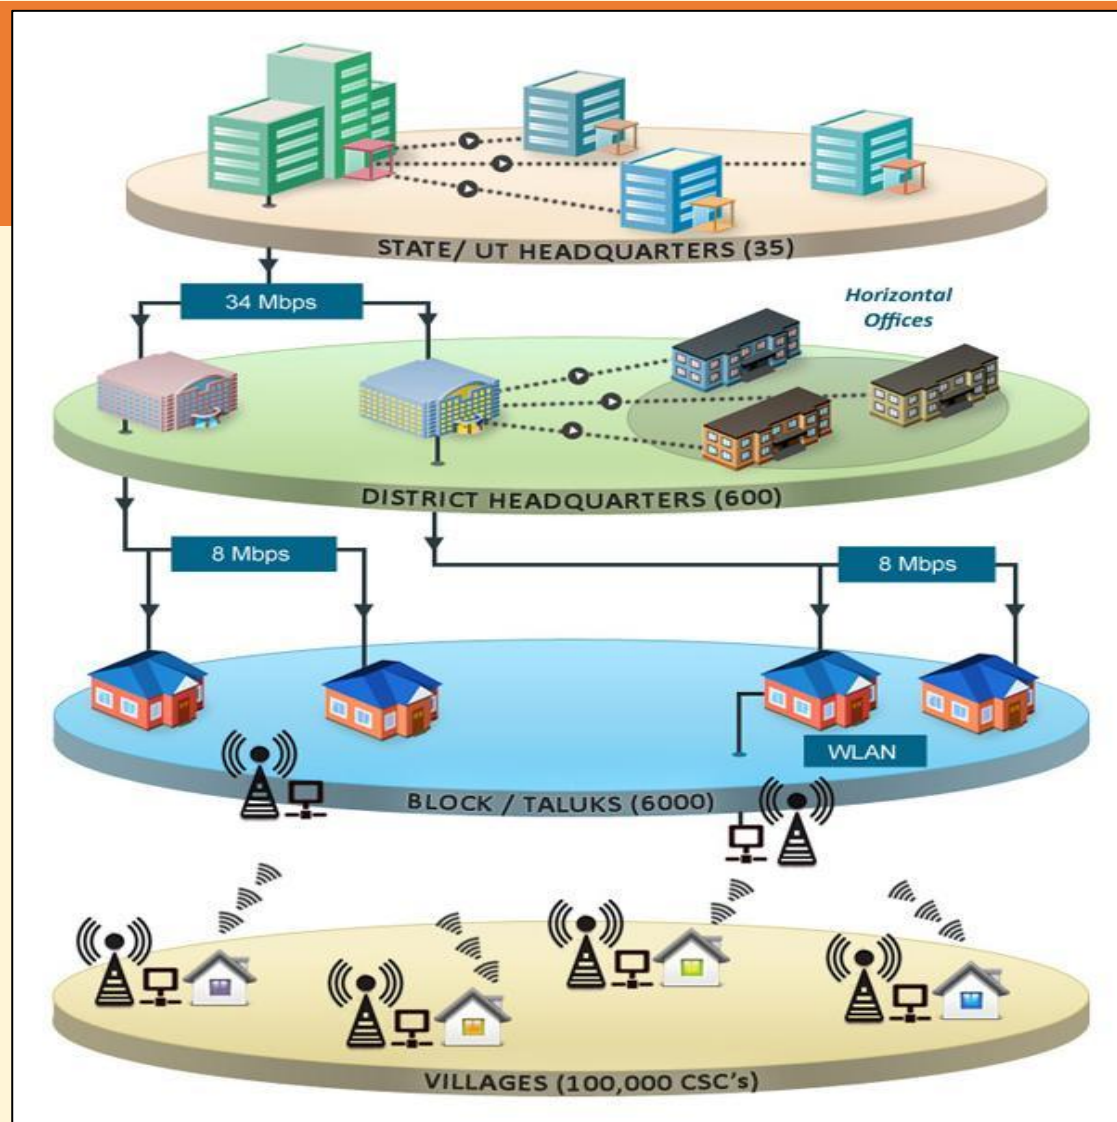

# National Resource Center for EHR Standards(2013)

The image shows a screenshot of the website for the National Resource Centre for EHR Standards. At the top left is the organization's logo, which features a stylized human figure with arms raised, set against a background of the Indian national flag's saffron, white, and green stripes, with a blue cross below. To the right of the logo, the text "National Resource Centre for EHR Standards" is displayed in a blue and black font. Further right is a navigation menu with the following items: "Services", "Standards", "About Us", "Contact Us", and "More". Below the navigation menu is a large, dark banner with a grid of hexagonal icons representing various medical and scientific concepts. The text "EHR Standards for India" is prominently displayed in the lower-left corner of the banner. On the right side of the banner, there is a word cloud of various international standards and organizations, including "ISO 18308:2011", "ISO 13606", "MDD", "Local Identifier", "SNOMED CT", "DICOM PS3.0-2015", "UIDAI Aadhaar", "openEHR", "ISO 13940", "HL7 V2", "LOINC", "HL7 C", "ICF", "WHO", "ISO/IEC", "IEEE/NEMA", and "Pharmacy Practice".

# Network Readiness

- National Knowledge Network (NKN)
- National Optic Fiber Network (NOFN)
- State Wide Area Network (SWAN)

# India International Initiatives

# Ministry of External Affairs Project, Govt. of India

## SAARC Telemedicine Network

- Implementing Agency: Telecommunications Consultants India Ltd. (TCIL)
- Connectivity: Satellite & fiber optic network
- Networking of one/two hospitals in each of the SAARC countries with 3-4 Super Specialty hospitals in India
- Current Status: JDWNRH, Bhutan , Indira Gandhi Child Hospital, Kabul, Afghanistan & Patan Hospital, Kathmandu, Nepal with SGPGIMS, Lucknow & PGIMER, Chandigarh with academic activities

## Pan-African e Network Project

- Implementing Agency: TCIL
- 53 countries of the African Union
- Connectivity: Satellite & fibre optic network
- Activities: tele-healthcare & tele-education
- Current status: 47 African countries joined the project

# SAARC Telemedicine Snapshots

# Snap Shot of PAN Africa Telemedicine Studio

# ASEAN (CLMV) e-Network

- Under ASEAN-INDIA Bilateral Co-operation program, ASEAN (CLMV) e-Network Project was proposed
- A delegation from CLMV Countries were invited to participate in a workshop in New Delhi held on 25-26, March 2009 to share Indian experience in Telemedicine & Distance Education. Pan-African e-Network operation was demonstrated at TCIL HUB & Data Center
- Subsequently a delegation from India visited CLMV countries from 25<sup>th</sup> Jul to 7<sup>th</sup> August 2011 to carry out Telemedicine and Tele-education Need assessment Study.
- The project once operational will facilitate CLMV countries to get connected reputed Indian medical institutions and universities

# Central Asia eNetwork Project

- Ministry of External Affairs, Govt. of India is in the process of deploying eNetwork for tele-education and tele-medicine in five central asian countries in the same way as in PAN Africa eNetwork
- Kazakhstan , Kyrgyzstan , Tajikistan Turkmenistan & Uzbekistan

# Conclusion

- Indian Telemedicine Programme is getting matured with indigenous technology, system and process
- Digital India Mission has further strengthened the policy for adoption of telemedicine in Indian Health Delivery System
- However, Large country with over billion population, diverse social and cultural background, federal nature of governance where health is a state subject are acting as impediments for rapid acceptance
- Difficult Geographical regions - North and North East, Deserts and Rural Communities having poor connectivity are challenges
- Future success: Medical College Network, Rural Telemedicine Network, Reaching out mountains and deserts using Indian Satellite System
- Rapid deployment of Mobile Broad Band and reducing cost of Smartphones hold great promise for mHealth deployment in rural settings and home

Thank You

# Taj Mahal

INDIA
